West Lafayette, IN | (574) 309-2538 | aniwaghgray@gmail.com | aniwaghgray.com | linkedin.com/in/anitejwaghgray | github.com/aniwag2

PROFESSIONAL SUMMARY

Computer Science graduate of Purdue University with software engineering experience across full-stack web development, API integration, data analytics, and containerized deployment in Python, Java, Go, and JavaScript.

TECHNICAL SKILLS

Languages: Python, Java, C, Go, JavaScript, R, SQL

Web: React, Node.js, Express.js, MongoDB, MERN Stack, Flask, REST APIs, HTML5, CSS3

Data & Tools: pandas, Microsoft Power BI, exploratory data analysis (EDA), web scraping, ETL, Docker, Git, GitHub, Linux, Agile

Coursework: Data Structures & Algorithms, Systems Programming, Databases, Software Engineering

PROFESSIONAL EXPERIENCE

Web3Sense — Software Engineering Intern

Remote | June 2024 – July 2024

- Built an anomaly detection system integrating the SimpleHash API, doubling operational efficiency of data review workflows.
- Optimized social media API data ingestion pipelines, achieving a 200% improvement in processing performance.

Indiana Technology and Manufacturing Companies (ITAMCO) — Software Engineering Intern

Argos, IN | May 2023 – July 2023

- Built an API connection between a production database and Microsoft Power BI, enabling real-time data visualization for stakeholders.
- Contributed to full-stack development of QuPiD, an internal production management web application.

Lucy Family Institute, University of Notre Dame — Software Development Volunteer Intern

Notre Dame, IN | June 2021 – August 2021

- Built front-end interfaces in Flask, HTML, and JavaScript for a web application compiling patient records for hospitals in Mexico, including five distinct patient intake form types.

Wabash National (Purdue Corporate Partners Course) — Data Analyst, Student Team

West Lafayette, IN | August 2022 – December 2022

- Analyzed transportation logistics datasets in pandas and R, presenting graphical findings and recommendations to corporate stakeholders.

SAP — Sales Operations & Strategic Support Intern

Chicago, IL | October 2025

- Partnered with SAP Services leadership on sales operations across enterprise cloud accounts, improving forecast accuracy through structured close plans.
- Applied knowledge of the SAP cloud and AI roadmap, including SAP RISE and public cloud migration, to support customer transformation initiatives.

TECHNICAL PROJECTS

Theralert — Founder & Full-Stack Developer

Remote | December 2023 – Present

- Designed a notification web application in Go that updates nursing home patients' families on patient activity.
- Containerized the application with Docker and self-hosted it on a home lab environment, enabling nursing homes to register and deploy the service.

BoilerList — Full-Stack Developer

West Lafayette, IN | May 2025 – August 2025

- Developed a student marketplace web application using the MERN stack (MongoDB, Express.js, React, Node.js).
- Implemented secure user authentication and a centralized listing platform for Purdue students to buy and sell items.

EDUCATION

Purdue University — Bachelor of Science in Computer Science

West Lafayette, IN | August 2022 – May 2026

LEADERSHIP & ACTIVITIES

- Eagle Scout, Boy Scouts of America — led service projects spanning construction and conservation.
- Organized a volunteer initiative preparing 200 meals weekly for local shelters during the pandemic.
