Granby, CT | (574) 309-2538 | aniwaghray@gmail.com | linkedin.com/in/anitejwaghray | github.com/aniwag2 | aniwaghray.com

PROFESSIONAL SUMMARY

Computer Science graduate (Purdue University, 2026) with three software engineering internships and two self-directed full-stack applications built in Python, Go, Java, and JavaScript. Delivered a 200% improvement in API data ingestion throughput, a 2x increase in data review efficiency, and eliminated 5 hours of manual reporting per week through automated BI pipelines. Seeking an entry-level Software Engineer or Data Analyst role.

TECHNICAL SKILLS

Languages: Python, Java, C, Go, JavaScript, SQL, R, HTML5, CSS3

Frameworks & Libraries: React, Node.js, Express.js, Flask, pandas, NumPy, REST APIs, MERN Stack

Data & Analytics: SQL, Microsoft Power BI, pandas, ETL pipelines, exploratory data analysis (EDA), data visualization, dashboarding, web scraping, anomaly detection, data modeling

Databases & Infrastructure: MongoDB, relational databases (SQL), Docker, containerization, Linux, CI/CD, self-hosted deployment

Tools & Practices: Git, GitHub, Agile/Scrum, version control, code review, pull requests, debugging, API integration, technical documentation

Coursework: Data Structures & Algorithms, Systems Programming, Databases, Software Engineering, Object-Oriented Programming, Computer Architecture, Statistics

SOFTWARE ENGINEERING EXPERIENCE

Web3Sense — Software Engineering Intern

Remote | Jun 2024 – Jul 2024

- Engineered an anomaly detection system in Python integrating the SimpleHash REST API, doubling (2x) the operational efficiency of data review workflows.
- Optimized the Twitter API data ingestion pipeline, achieving a 200% improvement in processing throughput.
- Collaborated within a 7-engineer Agile team on a 2-week sprint cadence, participating in daily standups and peer code review.

ITAMCO — Software Engineering Intern

Argos, IN | Jun 2023 – Jul 2023

- Developed a REST API connection between a production SQL database and Microsoft Power BI, delivering real-time manufacturing dashboards displayed plant-wide.
- Eliminated 5 hours of manual reporting per week by automating the data pipeline from the production database into the BI layer.
- Contributed full-stack features and technical documentation to QuPiD, an internal production management web application.

Wabash National (Purdue Corporate Partners) — Data Analyst

West Lafayette, IN | Aug 2022 – Dec 2022

- Performed exploratory data analysis (EDA) on transportation logistics datasets of several thousand records using pandas and R.
- Built data visualizations translating raw logistics data into operational efficiency findings for a non-technical audience.
- Presented findings and recommendations to a final executive readout of 10 corporate stakeholders.

Lucy Family Institute, Univ. of Notre Dame — Software Development Intern

Notre Dame, IN | Jun 2021 – Jul 2021

- Learned Flask to contribute to back-end development of a web app that compiles and organizes patient records for disadvantaged Mexican hospitals.
- Leveraged HTML and Javascript to develop front-end and create forms for patient input for the same app.

TECHNICAL PROJECTS

Theralert — Founder & Full-Stack Developer

Dec 2023 – Present

- Architected and built a real-time notification web application in Go that delivers patient activity updates to families of nursing home residents.
- Containerized the application with Docker and deployed it to a self-hosted Linux server, sustaining 111+ consecutive days of uptime in production.
- Designed the backend data model and REST API endpoints supporting multi-facility registration and independent onboarding.

BoilerList — Full-Stack Developer

West Lafayette, IN | May 2025 – Aug 2025

- Built a student marketplace web application on the MERN stack (MongoDB, Express.js, React, Node.js) across 270+ engineering hours on a 3-person team.
- Implemented secure user authentication, session management, and centralized listing and search functionality.
- Containerized the application for production deployment and managed version control through Git feature branching and pull request code review.

ADDITIONAL EXPERIENCE

SAP — Sales Operations & Strategic Support Intern

Chicago, IL | Oct 2025

- Supported enterprise cloud sales pipeline forecasting and close planning with SAP Services leadership.

EDUCATION

Purdue University — B.S., Computer Science

West Lafayette, IN | Aug 2022 – May 2026

LEADERSHIP & ACTIVITIES

- Eagle Scout, Boy Scouts of America — led a construction and conservation service project, coordinating 7 volunteers across 100 hours of planning and execution.
- Organized a community volunteer initiative preparing 200 meals weekly for local shelters during the COVID-19 pandemic.
